# Several Postdoctoral Open Positions

## Synthetic bacterial lipid rafts to optimize industrial bioprocesses

We invite applications for postdoctoral students positions in the laboratory of Daniel López at the CNB-CSIC (Madrid). This laboratory specializes in molecular microbiology. The research project focuses on defining the architecture of bacterial lipid rafts and adapting rafts to generate microbial platforms with optimized metabolic pathways for industrial innovation.

This project is funded by the European Commission Horizon 2020 through the action BIOTEC-03-2016. These projects are dedicated to excellence in research and seek to attract highly-motivated investigators with outstanding qualifications. **We specially welcome applications with strong background in molecular microbiology, structural biology, protein biochemistry and electron microscopy.**

More information at our website: [www.daniellopezlaboratory.com](http://www.daniellopezlaboratory.com)  
Informal inquiries, contact Daniel López at [dlopez@cnb.csic.es](mailto:dlopez@cnb.csic.es)

Applications from suitably qualified people from all sections of the community regardless of race, gender or disability. **Please send applications** including a short letter of motivation, CV, copies of relevant documents and contact information of academic references as single pdf. file to:

[dlopez@cnb.csic.es](mailto:dlopez@cnb.csic.es) until **SEPTEMBER 30th 2016**
