

# Enhancing your Image - An Introduction on how to colour EM images using Photoshop

28 September 2016, John Innes Centre, Norwich, UK

## Course Description

A small, practical workshop in the use of **Adobe Photoshop** to **colour** and **enhance** images from electron microscopes. It is aimed at **beginners** wishing to learn how to **produce** eye-catching images for **posters**, theses, scientific publications or promotional and marketing material. Each attendee will have access to a workstation running **Photoshop** within a purpose-designed **IT training theatre**. It will be run by an award-winning expert, **Steve Gschmeissner**, who will explain this special application of **Photoshop** and run through examples of each stage in the **process** before allowing time for attendees to attempt **colouring** their own images.
